# AMERICA'S ELITE 1000

## THE LISTINGS

The 1000 names on our list are the editors' choices of the finest shops, services and luxury goods that America has to offer. Every company or individual proposed for inclusion has been checked and cross-checked by our network of contributors, advisors and contacts, to ensure that inclusion is merited. The names have been selected on the basis of the current excellence of their products and services, rather than simply a high profile or impressive past reputation. Equally, all names have been judged against a pan-American standard of excellence, rather than being selected on a state-by-state basis. All of the entries will be reviewed and updated annually.

While the *Elite 1000* naturally includes the acknowledged greats, it also contains many less predictable names. Readers may be surprised to find certain famous names missing from the list. If they did not qualify, it is because they appear to have succumbed either to the temptation of resting on their laurels, rather than constantly reviewing and upgrading their standards, or to the temptation of becoming too commercial and populist.

Entries described as *Best Kept Secrets* are specialty shops and services. Many of the names are already well-established but deserve to be more widely known. Some of them are hardly known outside the inner circle of America's cognoscenti. All of them offer outstanding quality and an indefinable 'something special'.

We have also highlighted *Rising Stars*, those firms which, in our opinion, will soon make it to the very top in their particular field. Some of these firms may not have yet fulfilled their potential or proved that they have real staying power but their commitment to excellence is unquestioned.

## HOW TO USE THIS BOOK

The *Elite 1000* is published in alphabetical order, across all product categories. The names are cross-referenced in three indexes, to enable you to use this book in a variety of ways. For example, if you are traveling to a particular city, you would use the city index to discover the best of everything in, say, Washington D.C. On the other hand, if you are the best in a certain field—say jewelers or antique dealers—you would use the product category index, which will list all names under the relevant category heading. In addition, there is a straight alphabetical index of all names which have been included in the Listings section of the book.
